Portfolio: sujit-gajare.github.io/resume

Summary

Senior Frontend Developer with 4+ years of experience building scalable enterprise web applications using Angular. Strong expertise in micro-frontend architecture, performance optimization, and API integration. Experienced in CI/CD automation and improving application stability in production environments, integrating WCAG 2.2 standards and WAI-ARIA best practices into the development lifecycle to ensure inclusive user experiences. Hands-on exposure to React fundamentals, including functional components and hooks, with the ability to adapt quickly across frontend frameworks in Agile teams.

Experience

Infosys

Technology Analyst — 03/2022 - 07/2025

- Spearheaded frontend architecture for enterprise-grade applications using Angular 14+, HTML5, and SCSS, achieving a 30% improvement in initial page load times.
- Architected and deployed micro-frontend solutions to enhance modularity and scalability across multi-functional development streams.
- Directed a team of 6 junior developers through code reviews and systematized quality checks, ensuring 100% adherence to Angular best practices.
- Collaborated with UX designers and backend engineers to integrate REST/GraphQL APIs, streamlining the delivery of high quality, user-centric features.
- Boosted application stability by increasing unit test coverage from 55% to 85% using Jasmine and enforcing strict quality gates via SonarQube.
- Orchestrated CI/CD pipelines with AWS, Docker, and Bamboo in partnership with DevOps, reducing release cycle times.
- Implemented WCAG 2.2 Level AA and W3C authoring practices using semantic HTML and ARIA, ensuring accessibility compliance without introducing visual or functional regressions.
- Implemented complex ARIA patterns and managed focus states for dynamic Angular components.
- Interpreted accessibility violations from internal audits and automated scanners (Axe, internal tools) to author source-level fixes in TypeScript, SCSS, and HTML.
- Tested accessibility using NVDA, JAWS, and Voiceover with keyboard-only navigation to validate real-world user experience.
- Authored custom accessibility fixes using JavaScript / TypeScript and jQuery for legacy components.
- Resolved critical production bottlenecks using ELK and ServiceNow to maintain high system availability
- Earned multiple Rise and Insta Awards for innovation, leadership, and consistent delivery excellence on high-impact projects.

TechIMO Transformations Pvt Ltd

Team Lead and Developer — 03/2021 - 03/2022

- Developed and maintained semantic, WCAG-compliant HTML/CSS templates for Shopify and WordPress using JavaScript, CSS, and Bootstrap, ensuring responsive and accessible user interfaces.
- Collaborated with clients for requirement gathering, sprint planning, and deployments.
- Led a team of 6 developers to deliver custom websites, web applications, web features, and performance enhancement solutions.

Skills

Frontend: Angular, React, TypeScript, JavaScript, jQuery, HTML5, CSS3, Bootstrap.
State & Data: RxJS, NgRx, REST, GraphQL, JWT
Testing & Quality: Jasmine, Unit Testing, SonarQube (quality gates, code analysis)
Accessibility**:** WCAG 2.2, Section 508, WAI-ARIA, Semantic HTML5, NVDA, JAWS, Keyboard Navigation testing, Voiceover Axe-tool, Lighthouse.
DevOps & Monitoring: AWS, Docker, Bamboo, CI/CD, ELK Stack (log analysis, production debugging)
Collaboration & Workflow Tools: Jira (Agile / ticketing), Git, GitHub (version control), ServiceNow (incident & production issue tracking), Confluence (technical documentation).

Projects

My Plan Manager

03/2022 - 07/2025

My Plan Manager – Vanguard Enterprise Financial Platform

- Developed and maintained 8 Angular micro-frontends for an enterprise financial platform
- Enforced a modular micro-frontend architecture with RxJS for modular development and independent deployments
- Integrated REST and GraphQL APIs for real-time portfolio data synchronization
- Streamlined application performance using lazy loading and code splitting
- Conducted manual keyboard-only navigation checks and used NVDA to identify and fix navigation and focus issues impacting users with visual impairments.
- Applied ARIA attributes and focus management where required for dynamic Angular components.
- Performed targeted fixes using TypeScript, JavaScript, and jQuery for legacy or third-party UI components.
- Delivered WCAG 2.2 compliant responsive UIs

Education

Nowrosjee Wadia College

Pune

Masters in Computer Science

07/2017 - 05/2019

Pad Dr DY Patil ACS college

Pune

Bachelors in Computer Science

07/2014 - 05/2017

St Vincents Jr College

Pune

HSC

06/2012 - 03/2014

Army Public School Kirkee

Pune

SSC

06/2010 - 03/2012

Key Achievements

Quality Assurance Improvement

Increased unit test coverage from 55% to 85% using Jasmine and enforced quality gates through SonarQube.

Performance Optimization

Improved core application performance resulting in a 30% improvement in initial page load time

Awards

Awarded multiple Rise and Insta Awards at Infosys for delivery excellence, innovation, and consistent high performance on enterprise projects.
