Portfolio: sujit-gajare.github.io/resume

Summary

Senior Frontend Developer with 4+ years of experience building scalable enterprise web applications using Angular. Strong expertise in micro-frontend architecture, performance optimization, and API integration. Experienced in CI/CD automation and improving application stability in production environments. Hands-on exposure to React fundamentals, including functional components and hooks, with the ability to adapt quickly across frontend frameworks in Agile teams.

Experience

Infosys

Technology Analyst 03/2022 - 07/2025

- Spearheaded frontend architecture for enterprise-grade applications using Angular 14+, HTML5, and SCSS, achieving a 30% improvement in initial page load times.
- Architected and deployed micro-frontend solutions to enhance modularity and scalability across multi-functional development streams.
- Directed a team of 6 junior developers through code reviews and systematized quality checks, ensuring 100% adherence to Angular best practices.
- Collaborated with UX designers and backend engineers to integrate REST/GraphQL APIs, streamlining the delivery of high quality, user-centric features.
- Boosted application stability by increasing unit test coverage from 55% to 85% using Jasmine and enforcing strict quality gates via SonarQube.
- Orchestrated CI/CD pipelines with AWS, Docker, and Bamboo in partnership with DevOps, reducing release cycle times.
- Engineered WCAG compliant, responsive user interfaces, ensuring seamless accessibility across all browsers and devices.
- Resolved critical production bottlenecks using ELK and ServiceNow to maintain high system availability
- Earned multiple Rise and Insta Awards for innovation, leadership, and consistent delivery excellence on high-impact projects.

TechIMO Transformations Pvt Ltd

Team Lead and Developer 03/2021 - 03/2022

- Developed and maintained Shopify and WordPress web applications with JavaScript, HTML, CSS, Bootstrap, ensuring responsive UI and seamless functionality.
- Implemented responsive web designs and ensured WCAG accessibility compliance.
- Collaborated with clients for requirement gathering, sprint planning, and deployments.
- Led a team of 6 developers to deliver custom websites, web applications, web features, and performance enhancement solutions.

Skills

Frontend: Angular, React, TypeScript, JavaScript, HTML5, CSS3
State & Data: RxJS, NgRx, REST, GraphQL, JWT
Testing: Jasmine, Unit Testing

DevOps: AWS, Docker, Bamboo, CI/CD

Projects

My Plan Manager
03/2022 - 07/2025

My Plan Manager Vanguard Enterprise Financial Platform)

- Developed and maintained 8 Angular micro-frontends for an enterprise financial platform
- Enforced a modular micro-frontend architecture with RxJS for modular development and independent deployments
- Integrated REST and GraphQL APIs for real-time portfolio data synchronization
- Streamlined application performance using lazy loading and code splitting
- Executed secure JWT-based authentication and upheld secure coding practices
- Automated CI/CD pipelines using AWS, Docker, and Bamboo
- Delivered WCAG 2.1-compliant responsive UIs

Education

Nowrosjee Wadia College
Pune

Masters in Computer Science
07/2017 - 05/2019

Pad Dr DY Patil ACS college
Pune

Bachelors in Computer Science
07/2014 - 05/2017

St Vincents Jr College
Pune

HSC
06/2012 - 03/2014

Army Public School Kirkee
Pune

SSC
06/2010 - 03/2012

Key Achievements

Quality Assurance Improvement
Increased unit test coverage from 55% to 85% using Jasmine and automated quality gates through SonarQube

Performance Optimization
Improved core application performance resulting in a 30% improvement in initial page load time

Awards
Awarded multiple Rise and Insta Awards at Infosys for delivery excellence, innovation, and consistent high performance on enterprise projects.
